1. Fill every row, column, and 3×3 box with the digits 1–9. No repeats.
2. Dashed cages must add up to the small number in the corner. Digits do not repeat inside a cage.
3. There is one logical solution. You do not need to guess.

Print at **Actual size** (100%). Do not choose “Fit to page.”

Scan the QR code on any puzzle page to open the same board online and use a logical hint.
